Local Inventor In Limelight

Frank Wright, our local town secretary, stands a big chance of falling in with riches, as a result of having perfected a burglar-proof hinge.

For some time Frank has been spending his spare moments centering his thoughts on how to contrive a hinge that would defy the burglar manipulating the screw-driver, and the new patent has that effect, for not a screwhead is visible.

American and Canadian patents have been issued, and word from other countries is being awaited. In the meantime capital and manufacturers are becoming intensely interested, and already Frank has received buy-out offers running high up in the five figures.

Groom Must Be Brave

Look at Luxury Taxes He Pays

This is the month that ministers plan on reaping a harvest from love lost young people. This is the month when the moon is supposed to be beautiful and star-gazing is in vogue, all of which practices are said to be conducive to proposals.

However true this may be and how lovely may be the dream of happiness there is always somebody to take the joy out of life and this time it is Sir Henry Drayton. He apparently figures something along the line of the ill wind, etc., because when two young people now endeavor to make life happier for themselves Sir Henry considers that the government should get a slice of it. So he has tacked on the luxury tax, which makes the young people fork over another sixty or seventy dollars or so, according to their tastes. This figure is the luxury tax the government gets out of the usual marriages.

Will the luxury tax make the young men and women run into the arms of the marriage?

This is a question that will be hard to answer. But if the fear of further increased prices ruling this "lumpy" stuff enters into their consideration, it is quite possible a hurry up call will be sent out by many. Since May 19, those who have told their lady love just how much they want to have then have had to pay dearly for their "wedding-day" needs.

If the young man has been carrying his sparkler with him for some time he is lucky, but if he has to buy it now he is otherwise. That \$200 sparkler he has so fondly dreamed about placing on his dear one's finger, will just cost him an other forty odd cold shillings—which go on to the government.

That is only one item. Let's look at the other side of the contract. In preparing her trousseau she would pay out something like the following:

	Price	Tax
Silk for gown	\$25.00	\$2.50
White kid pumps	12.00	1.20
Crape tie chain figure	15.00	1.50
Gloves	5.00	.50
Traveling suit	75.00	7.50
Hat	20.00	2.00
Boots	15.00	1.50
Total tax		\$17.00

When a man gets married, it is said, he likes to spread his money around like water and "do things up right." The marriage market just now spreads it around for him as the following table shows:

	Price	Tax
Shoes	\$12.00	\$1.25
Shirt	4.00	.40
Suit	70.00	7.00

H. J. BENSON, Proprietor

Blairmore School District No. 628

By-Law No. 4

A BY-LAW relating to the issue of Debentures of the Blairmore School District No. 628, of the Province of Alberta.

WHEREAS it is necessary and desirable that the sum of \$14,000.00 (Fourteen Thousand Dollars) should be borrowed on the security of the Blairmore School District No. 628 of the Province of Alberta, for the purpose of erecting an additional two rooms to the present building; also equipment, apparatus, and furniture for same, and installation of a septic tank and repairs to property, and that debentures covering same should be issued repayable to the bearer in 10 equal consecutive annual instalments with interest at the rate of not more than six per centum per annum.

NOW THEREFORE, The Board of Trustees of the said School District enacts as follows.

(1) That the necessary proceedings be taken under the school ordinance to obtain the sanction of the Board of Public Utilities Commissioners of Alberta to the said loan.

(2) That upon the Board of Public Utilities Commissioners authorizing in writing the Board of Trustees to borrow the said sum; pursuant to the said ordinance, debentures of the said district be issued for such amount as is so authorized, payable to the bearer in 10 equal consecutive annual instalments with interest at not more than six per centum per annum, payable annually, and said debentures shall be executed by the Chairman and Treasurer of this Board.

A. HAMILTON, Chairman
J. B. HARMER, Secretary-Treas.

Derby	8.00	.80
Stocks	1.50	.15

Total tax \$8.80

The said district may create barely under the tax, costing \$1.75. Combined taxes on the personal outfit of the bride and groom have now amounted to \$23.00, with a \$10 tax on the solitaire, making a total of \$66.60.

Finally it slips on her finger that little band of gold, on which he should probably pay a \$2.00 tax, which brings the combined taxes up to \$68.60. This is a trivial amount, however, when compared to the expenditures made for wedding presents and house furnishings.

Commissioner Wm. Eadie To Visit Coleman

Commissioner William Eadie, of the Salvation Army, who is directing the affairs in Canada West, will, together with other staff officers of the Army, be visiting Coleman, on Wednesday, June 23rd, and will conduct a special public meeting in the evening. We understand that the commissioner has had a wide experience, and is very well informed of the Army's activities throughout the world.

Fuller particulars of this event will be given in our next issue.

All advertising signs on British Columbia highways, 33 feet from the centre of the road, after July 1st will be destroyed by the roadmen. It is contrary to the Highway act to put advertising signs on the roadway.

Problems of West Discussed at Big Industrial Congress

Calgary.—The second annual industrial congress opening at Calgary attracted several hundred business men and farmers from all parts of the country. A feature was the appearance of 200 members of the Canadian Manufacturers' Association and the weather man was on his good behaviour. President M. A. Brown opened the congress, and premier Stewart assigned the delegates and visitors. In his address he emphasized the value to the country of the organized effort that had made the meeting an annual affair. As president Howard of the manufacturers' association said the work of the congress is on a big scale, managed by men of vision, who are helping put the west on the map and develop a spirit of co-operation throughout the Dominion. Col. Dennis discussed irrigation, one of the important problems of the west, and F. H. Peters, commissioner of irrigation, talked along the same lines. T. A. Hornibrook, president of the board of trade, and mayor P. C. Marshall, of Calgary, added their voices to the general note of welcome. The speeches were concluded by R. B. Brunett.

Hon. Geo. P. Smith, speaking as the representative of the province, said that the province was anxious to encourage a well rounded business condition. He knew there was some uncertainty in general conditions, but he believed the city just as necessary as the rural district. All classes are necessary in this day of complicated social conditions. The province is anxious to encourage manufacturing industries, but only those which had conditions here reasonable and natural. Speaking of the conflict between consumer and producer, the speaker said he thought profiteering had been done by capital. If manufacturers could convince the country that they were doing all they could for bringing prices back to normal, it would be less difficult to induce labor to accept more moderate wages, but he desired to emphasize that he did not believe profiteering was confined to any particular class. It was general. T. A. Hornibrook, president of the board of trade, called attention to the fact that Calgary is the centre of the second largest irrigation system in the world. Brig-Gen. MacDonald, general manager of the Industrial Development Association, received a great ovation when he replied to the addresses of welcome. He was sure the work of the organization was sound, and was appreciated by the country generally. He thanked the visitors for their contributions and activities in behalf of the association.

Col. J. S. Dennis was greeted enthusiastically when he was introduced as the greatest authority on irrigation on the continent. Col. Dennis spoke with the authority of 45 years in western Canada in the services of the Dominion government, Hudson's Bay Company and the Canadian Pacific Railway. Capital and labor, he conceived to be a part of the success of colonization and development. The payment of the national debt cannot be settled except by colonization and industrial development. Thirty million acres of selected good agricultural land is today lying idle within fifteen miles of the established railway lines of the four western provinces.

Budget in Committee

Luxury Tax Will Likely be Subjected To Some Changes

Ottawa.—The formal budget debate out of the way, consideration of the budget resolution in committee will open with the least possible delay. Here, in all probability discussion will be protracted, covering possibly a week or so. Provisions made in regard to income tax and business profits tax are expected to go through without a doubt.

The luxury taxes will be subjected to some changes. It is thought, particularly with a view to making their administration more workable. Since the budget was brought down the minister of finance has been in constant receipt of representations with regard to the luxury taxes and the sales tax. Important points have been brought up and notice will no doubt be taken of some of the suggestions. In addition to any amendment which the finance minister may propose, it is likely that a number will be submitted by members of the opposition.

Some Profit in Clothing

Farmer Sold Wool For Fifty Suits and Got One With the Price

Toronto.—The Globe published the following despatch from Hickman, Ky.: Roy Shaw, a well-known farmer living near Hickman, took 200 pounds of wool to Hickman the other day, which he sold for 30 cents a pound, or for \$60.00. Then he purchased a suit of clothes for his son, and found that the money he received for the wool was just enough to pay for the suit. He says there are about four pounds of wool in a suit of clothes, and on that basis the wool he sold will make fifty suits, which is sold at \$60 a suit, would hence the title \$3,000. Allowing one-half for labor and other materials going into the suit, somebody will get a return of \$1,500 on a \$60 investment, he figures.

Respect Wishes of Canada

Do Not Consider It Advisable to Publish Correspondence

London.—In the house of commons recently the colonial under-secretary of state said it had been agreed by the British and Canadian governments that it would be inadvisable to publish at present the correspondence regarding the appointment of a Canadian representative at Washington. Percy Hurd and Sir Richard Cooper demurred somewhat at this answer but Andrew Bonar Law said that the British government must consider also the desires of the Canadian government in such matters.

Chief of Police

St. Paul, Minn.—Thomas E. Campbell, for three years chief special agent in the Minnesota bureau of investigation, department of justice, has accepted the post of chief of police in St. Paul, effective June 6.

Discuss Value of Good Roads as An Aid to Agriculture

Winnipeg.—The value of good roads as an aid to agriculture, as a factor in the development of the country and as an inducement to tourist traffic, were some of the topics, apart from the professional and technical ones that were discussed at the two sessions of the Canadian good roads convention here.

Hon. F. C. Biggs, minister of public works, Ontario, declaring that the best way to increase production was to keep the boys on the farms, said that they had come to realize in the eastern province that they must have improved roads for bringing the boys to the consolidated schools and continuation schools, they were providing so that the children on the farms would not have to travel to the towns

to obtain the education required to fit them for their life's work. Herbert Cuthbert, executive secretary of the Pacific Northwest Tourist association, asserted that one million dollars would be spent in Canada each year by American tourists if the Dominion possessed a national highway.

A. P. Sandles, secretary of the National Crushed Stone Association, of Columbus, Ohio, asserted that there had been a reaction on the rates on road building and Mr. Biggs, commenting on these freight charges, observed that he could see no reason or common sense on the part of the Dominion government, if, after giving a grant to improve roads construction they would permit the railways to increase the freight rate on stone.

For Relief Work in Europe

Several Governments Have Arranged To Help in Rebuilding the Central Countries

Paris.—New and substantial credits for the relief and reconstruction of Central European countries, including Austria and Hungary, have been arranged by the governments of Great Britain, Denmark, Holland, Norway, Sweden and Switzerland. The credits are mainly in the form of raw materials and food and although the United States is not officially represented on the committee, it is co-operating in a large way, it is stated, by providing commodity credits for Central Europe.

Britain Builds Huge Airship

R-40 Will Be Equipped With All The Latest Improvements

Barrow, England.—Airship R-40, built here for the admiralty, will be launched in two or three weeks. She embodies the latest improvements in aircraft design and it is stated that she would fly across the Atlantic with ease. The vessel is 535 feet in length and 70 feet wide. Her lifting power is 38 tons. Four engines, each of 240 horsepower, will give her a maximum speed of 65 miles per hour. She will carry a crew of 15.

No Military Conscription

Signing of Peace Treaty Has Rescinded Conscription in Germany

Berlin.—It is semi-officially announced that no law will be enacted abolishing compulsory military service which is demanded by the peace treaty, because the national assembly's acceptance of the treaty automatically rescinded the former compulsory resolutions. This objection has been issued in view of the allegations that Germany is not carrying out the provisions of the treaty.

It is also announced that the minister of defence will issue a decree forbidding discharged soldiers to carry service rifles and hand grenades. This order is somewhat belated, as according to reports, thousands of discharged men all over the country are in possession of their full army outfits. A few days ago the police seized near Hanover, 194 hidden rifles and 190 swords and 10,000 cartridges.

Value of Good Railways

Hon. S. J. Latta Speaks of the Importance of Good Roads

Winnipeg.—The keynote of all good work in western Canada, and for that matter throughout the whole Dominion, was struck by the Hon. S. J. Latta, minister of highways for Saskatchewan, at the conclusion of the Canadian Good Roads convention when he affirmed that the essence of patriotism was the home, and that the things that touched the home nearest was transportation facilities. The minister had been describing the new Canadian problem of the west, and the making of the immigrant of European nationality a British citizen and he impressed his hearers that they had not only to get these people to understand the institutions of Canada, but they had to get them into a receptive frame of mind, and nothing would do more to produce this, he said, than getting them to love the country, because of what the country was doing for them.

Japan Suspects Plot

Negotiations for Buffer Siberian State Are All Off

Honolulu.—Japan has broken off negotiations with the Russian Bolsheviks for the formation of a buffer state in Siberia, according to a Tokyo cable to the Nippon Jiji, a Japanese newspaper here.

The breach in negotiations came about as a result of Japan's discovery of a plot to undermine General Semenov, commander of the all-Russian forces in Siberia and bring the Baikal region under the Bolsheviks, the cable stated.

Weather Aids Wheat Crop

Brandon.—The rains and cold weather of the past few days have been of immense benefit to the crop in the Red River district. One week ago, due to the dust storms, many fields looked brown and bare. Today everything is green and the roots of the wheat are driving deep down in the earth, making for a vigorous and sturdy growth and a promise of ability to withstand drought, should there be one at a later date.

W. N. U. 1219

Cowardly Attacks in Ireland

Five Members of Irish Constabulary Beat Back Five Hundred Rebels

Toronto.—The Toronto Evening Telegram published the following despatch from its correspondent at Belfast, Ireland: "Boys, don't mind me. Stick to your posts," shouted Sergeant Fitzpatrick, of the Royal Irish Constabulary, at Crossmag, 20 miles from Belfast, when he went down with a bullet through his lung while defending the barracks with five men, against an attack of five hundred rebels.

The attacks lasted two hours, during which the barracks were shelled with petrol. The police fought stoutly, and wounding several raiders, succeeding in beating them off. The raiders spoke in Irish when commands were given.

Fitzpatrick, a native of Fermanagh, and Constable Ramsay, conducted the defence. After Fitzpatrick was badly wounded, though he was so badly hurt he had to bleed on the floor, he still managed to counsel what to do in moments of distress. Constable Carry was wounded in the knee.

The attack on Clare barracks, Kings County, cost the rebels three killed and several wounded. Hand grenades knocked over several raiders. A man's leg and a finger and a cap with a bullet hole through it were found on the scene by the military who came to the rescue.

Continue Wheat Standards in U.S.

Reduction Urged Would Decrease Return to Farmers

Washington.—Continuation of the present federal wheat standards was decided upon by Secretary Meredith in an opinion covering hearings held to inquire into dissatisfaction in the central northwest with existing grades for hard red spring and durum wheat. Request for lowering the present standards, the secretary announced would tend to decrease the return to farmers while advocates of the change argued that the producer would receive more money for his grain.

The federal standards established in 1917 and revised in 1918 have been operative only under fixed price and war conditions, the secretary stated, adding that opportunity for fair tests of their merits or defects have now been afforded under normal marketing conditions.

Bid Sir Thos. Lipton Good Luck

Starts For America in Quest of the Cup With His Boat Shamrock IV.

London.—A crowd of people were at the station to wish Sir Thomas Lipton bon voyage and good luck in his quest for the American cup, with his boat Shamrock IV, against either the Resolute or the Vanitie. Dowager Queen Alexandra, in expressing her hopes that Sir Thomas would win with the Shamrock IV, said: "Certainly I am confident, but I am glad I am not too sure, for then there would be no sport for anyone."

Shortage of Laborers in West

Calgary, Alta.—That the west could absorb at least 20,000 men for railway construction, farm work and mining, was the statement made by Grant Hall, vice-president of the Canadian Pacific Railway, in the course of an interview here.

D. C. Coleman, vice-president of western lines, who was also present, confirmed this great shortage. They stated that there was a scarcity of unskilled labor in the east today, also, but not to the same extent as in western Canada.

Yukon Free of Ice

Dawson, Y. T.—The Yukon River is now entirely free from ice from Lake Laberge northward. Advances from interior Alaska say all restrictions there against travel because of influenza are being eased in the last 13 days. The first arrivals from Mayo Camp bring highly favorable reports of silver prospects in the Keno Hill district.

Safeguard Interests in Persia

London.—In reply to a question in the house of commons regarding the Bolshevik activity in Persia, Cecil B. Harmsworth, under-secretary for foreign affairs, said the Persian minister in London had been in constant touch with the British foreign office, and a considerable headway had been reached that both Persian and British interests would be safeguarded.

Britain is Not Yet Prepared to Trade with Russia

The Newsprint Situation

Sir Henry Drayton Tells Manufacturers Government Will Insist On Domestic Supply

Ottawa.—The conference with the newsprint manufacturers announced in the house took place in the finance minister's office. Sir Henry Drayton told the manufacturers that the government was much disturbed to find that, knowing the agreements made last fall, twenty-five percent of the daily newspapers in Canada were facing the period of suspension owing to inability to get newsprint paper, although willing to pay current prices for export to foreign countries. He said the government would insist upon the domestic requirements being supplied as they represent only 15 percent of the total production.

The situation is still regarded as very serious. The publishers are emphasizing the point that the total amount of newsprint necessary to the continued existence of the 26 daily newspapers affected represents less than two percent of the exports of newsprint and that they ask for no favors regarding price.

The publishers state that the great majority of the mills are keeping their Canadian customers supplied, and that the present crisis has been caused by the attitude of a very small minority.

The Hearst newspapers also had a representative in Ottawa interviewing the government regarding newsprint supplies. It is said that the consumption of newsprint of the Hearst papers is 200,000 tons, a substantial portion of which is made in Canada.

Will Open Office in London

Cabinet Grants Permission to Soviet Government

London.—As the first result of the meeting of Gregory Krassin, Russian Bolshevik minister of trade and commerce, with Premier Lloyd George and members of the British cabinet, the soviet government, according to the Evening Standard, has been granted permission to open immediately a central trading office in London. At this office, the newspaper says, an endeavor will be made to organize an exchange of goods with British traders.

Rain Ends Forest Fires

St. John, N. B.—Heavy rain in Northern New Brunswick and other districts put an end to the menace of many fires. Two new fires were reported near Newcastle, and another on the southwest Miramichi, but they are under control. Situation in Victoria and Madawaska counties is much improved. The fire at Glenora on the Esquimalt and Grand Trunk railway in Sanbury county, has burned about 1,200 acres.

Burned British Flag

Washington.—The United States department has asked the District of Columbia commissioners for a statement of fact as to the burning of a British flag in front of the treasury by women sympathizers with Irish freedom.

Want Government To Control Wheat For Another Year

Winnipeg.—Asserting that the Canadian Wheat Board cannot exercise control over the 1920 crop unless its authority is renewed at the present session of parliament, the executive committee of the Canadian Council of Agriculture telegraphed the Dominion government, urging that steps be taken to have government control of the wheat crop for at least another year.

The resolution as forwarded to Ottawa, recalls a resolution of the council of agriculture adopted last January, favoring government control of the wheat crop of 1920-21, provided that "controlled buying should be discontinued on the part of overseas importers of Canadian wheat." The resolution also states that the conventions of Alberta, Saskatchewan and Manitoba organized farmers subsequently approved

London.—Trade negotiations between the allies and Gregory Krassin, Russian soviet minister of trade and commerce, have not yet begun, according to Premier Lloyd George in the house of commons.

Replying to a flood of insistent inquiries, the premier said there were certain questions Great Britain wanted cleared up before it would undertake negotiations at all. It must be guaranteed that there will be no attacks on British interests in the east or at home while negotiations are proceeding. Mr. Lloyd George declared, and must guarantee to release all British prisoners. Great Britain must clear these questions out of the way herself, the premier added, after which allied negotiations could proceed.

Representatives of the French and Italian governments are in London.

It was further decided, said the premier, that the allied delegates were prepared to deal with the Russian delegates as to the best methods of removing the obstacles and difficulties in the way of resuming peaceable trade relations in the general interest of Europe.

The premier said that M. Krassin was the head of the delegation representing the Russian co-operative organization, but he was also minister of the soviet government also, as such, no doubt was acting in the name and under the authority of the Soviet government.

One of the members asked whether Krassin was not originally a German agent. The premier said he did not think he was, but that he was associated with a German firm of electricians. He was a Russian.

The members enquired whether it could be taken that the perturbation of the French public was without any foundation and that the negotiations were being acted upon. The premier replied: "I am not aware that there is great perturbation in France. The mere fact that some French newspapers are trying to foment trouble between two friendly and allied countries, whose friendliness is essential in the interests of the world, is no proof of French perturbation."

This was received with cheers.

Troops Are Gathering

Sensational Reports of Concentration Of Bavarian Forces Comes From Potsdam

Berlin.—The Tagblatt publishes under reserve sensational reports of the concentration of Bavarian troops in the neighborhood of Potsdam, and that Prince August Wilhelm, of Prussia, son of the former emperor, is playing a prominent part in the movement. It also publishes a rumor that the authorities intend in future to arrest all pacifists and a number of prominent Leftists.

Geddes Given Honorary Degree

Washington.—George Washington university, at its ninety-ninth annual announcement exercises conferred the honorary degree of Doctor of Laws on Sir Auckland Geddes, ambassador to the United States. Ambassador Geddes delivered the commencement address.

Be Careful What You Drop
"Drop a pebble in the water, just a splash and it is gone.
But there's half a hundred ripples circling on and on and on;
Spreading, spreading from the centre, flowing out into the sea,
And there ain't no way of telling where the end will ever be.
Drop an unkind word or careless, in a minute it is gone,
But there's half a hundred ripples circling on and on and on;
These keep spreading, spreading ever from the centre as they go,
And there ain't no way to stop them once you've started them to flow.
Drop a word of cheer and gladness, just a splash and it is gone,
But there's half a hundred ripples, circling on and on and on,
Bearing Friendship, Love and Truth on each sparkling, dancing wave,
And you wouldn't believe the service of that one kind word you gave."

Let's All Keep Smiling
(By J. H. Lartimore)
There is plenty of smiling in this old world now.
So it's up to us to keep smiling;
Perhaps you're down hearted, but any how,
It's up to you to keep smiling.
There's plenty of sorrow, plenty of pain,
Too little of sunshine and too much of rain;
But weeping and sighing are both done in vain.
And the best play is just to keep smiling.
The farmer who sows for a big crop of grain,
Why, it's up to that man to keep smiling;
When his harvest comes round, he has naught for his pains.
It is up to him to keep smiling.
For, spite of the failure, why, he's done his best.
And grinning and growing, it's freely confessed,
Won't that him a bit, so with real and with zest,
He should bury his grief and keep smiling.
The young man who's courting the maiden so coy—
Sure, you can't keep that fellow from smiling;
Though she gives him the mitten for some other boy.
Still, I think that he ought to keep smiling.
For there's many a fish yet uncaught in the sea,
And perhaps he'll do better next time, if maybe,
He gets ten times sweeter, then, 'twixt you and me,
He'll have much occasion for smiling.
The merchant who hopes from his sales to get wealth,
Will win if he'll only keep smiling;
The man whose desire is for wisdom and health,
Can't afford to do ought but keep smiling.
The jolly Jack Tar whose ship rides the foam,
The wanderer afar from his friends and his home,
The writer compiling the ponderous tome,
Will make their days brighter by smiling.
And so, whatever be your lot on this earth,
It's up to you, friend, to keep smiling;
You can't help your looks and you can't help your heart,
But you can help your fortune by smiling;
So, be of good cheer, though the skies be overcast,
Make the best of what comes and don't brood 'bout the past;
Keep your eye on the goal, and you'll triumph at last,
If you'll work with a will and keep smiling.

The Calgary 1920 Exhibition

The prize list for the Calgary Exhibition may be obtained by writing to E. L. Richardson, Manager, Calgary. The exhibition is to be held this year from June 10th to July 23rd and entries close on June 10th. Over \$7,000 has been added to the prizes for the live stock department this year, making the total amount offered in prizes, most generous.
The new hundred thousand dollar cattle stable and judging pavilion will be used for the first time this year and will add greatly to the comfort and convenience of the exhibitors.
Calgary is fortunate this year in being able to secure Lockyer, possibly the most daring acrobatic performer in the world. He does acrobatic stunts all over an aeroplane and finishes his act by changing from one machine to another in full flight in mid-air. This is positively the greatest attraction that can be obtained for any exhibition.
Auto Polo will also provide many thrills for fair visitors, while the musical programme will be provided by Canada's best musical band, the 48th Highlanders, of Toronto.
Special passenger rates will be in force for the Calgary Exhibition from all points in Alberta, Saskatchewan and British Columbia east of Golden on the main line and Nelson on the Crow's Nest.

American Speed

A British flyer, a major who taught the famous Pat O'Brien how to handle aeroplanes, was praising the swiftness with which America put through its war preparations.
"Over on the other side," he concluded, "we had hoped that the United States would profit by the mistakes of England and other nations during the first three years of the war; but you made more than that. You not only learned in one year what it took the other nations three years to learn, but you also made nearly all the mistakes in one year that we made in three."

Bald Heads To Let

Freak Occupations Which Bring Good Pay in Advertisement Market

Queer methods of earning a living are frequently coming to light in the Press and elsewhere.
A gentleman, grave-mannered and well-dressed, was paid by the proprietor of a well-known Parisian theatre to sit every day in one of the most exclusive cafes of the city with his head shaved completely bald. But in the place of hair the man's head bore the name of his employer's theatre and the name of the play running there at the time, with an injunction to "see it at once." This, however, was barefaced robbery, for Booth Tarkington, the well-known American playwright, describes a man in exactly the same position in one of his stories, and the man was evidently "pinched."
Such manners of engaging one's daily bread could only be followed by those hardened to public ridicule. But often a man or woman when in desperate straits for a need will resort temporarily to equally strange methods.
For instance, in the Latin Quarter of Paris, there are many little restaurants whose walls are covered with all manner of sketches, some done in grease-paint, others in black and white ink. Each of these sketches represents a hungry and penniless man and was drawn by the artist to pay for his meal. To trespass in this way on the good-nature of a proprietor would seem to be a privilege of art students in the Latin Quarter of Paris.
New York's Latin Quarter is named Greenwich Village, and, like the students quarter of Paris, it is given up to Bohemians, among them are many "fakes." The Latin Quarter of Paris would not tolerate a bogus Bohemian, but Greenwich Village hardly knows the difference. In point of fact, it is a crowded Bohemia in New York, a show place for visitors from all parts of America, and so it abounds in professional fakes.
Thus, in the little restaurants you will find queer, fantastically scribbled (long-haired men and bobbed-haired weird women), anarchists and nihilists—freaks, in fact, of every description, some may in reality be Bohemians, but it is safe to say that a large number are "fakes" and poeers. Proprietors of restaurants have been known to pay

Let's All Keep Smiling

(By J. H. Lartimore)
There is plenty of smiling in this old world now.
So it's up to us to keep smiling;
Perhaps you're down hearted, but any how,
It's up to you to keep smiling.
There's plenty of sorrow, plenty of pain,
Too little of sunshine and too much of rain;
But weeping and sighing are both done in vain.
And the best play is just to keep smiling.
The farmer who sows for a big crop of grain,
Why, it's up to that man to keep smiling;
When his harvest comes round, he has naught for his pains.
It is up to him to keep smiling.
For, spite of the failure, why, he's done his best.
And grinning and growing, it's freely confessed,
Won't that him a bit, so with real and with zest,
He should bury his grief and keep smiling.
The young man who's courting the maiden so coy—
Sure, you can't keep that fellow from smiling;
Though she gives him the mitten for some other boy.
Still, I think that he ought to keep smiling.
For there's many a fish yet uncaught in the sea,
And perhaps he'll do better next time, if maybe,
He gets ten times sweeter, then, 'twixt you and me,
He'll have much occasion for smiling.
The merchant who hopes from his sales to get wealth,
Will win if he'll only keep smiling;
The man whose desire is for wisdom and health,
Can't afford to do ought but keep smiling.
The jolly Jack Tar whose ship rides the foam,
The wanderer afar from his friends and his home,
The writer compiling the ponderous tome,
Will make their days brighter by smiling.
And so, whatever be your lot on this earth,
It's up to you, friend, to keep smiling;
You can't help your looks and you can't help your heart,
But you can help your fortune by smiling;
So, be of good cheer, though the skies be overcast,
Make the best of what comes and don't brood 'bout the past;
Keep your eye on the goal, and you'll triumph at last,
If you'll work with a will and keep smiling.

Two Good Reasons

Two good economical reasons why you should eat fish;
It is cheap and nutritious, and provides a thrifty meal.
One of Canada's greatest sources of wealth is her fisheries, and you help develop the industry by eating fish, and also help to put Canada in a better financial position.
Probably you are not aware how little fish Canadian people use.
Great Britain is one of the greatest fish consuming countries in the world. During 1918 she had a per capita consumption of 88 pounds, and in 1919, it is believed, this was increased to 90 pounds. This means that each individual consumed at the rate of more than one pound per week.
In the United States last year, it is estimated by officials at Washington, the per capita consumption was 19 pounds. Although little reliance can be placed in this estimate, there is no doubt but that the local consumption in the United States has increased greatly in recent years.
A few years ago the per capita consumption in Canada per annum was a matter of doubt. Through the combined efforts of the Canada Food Board and the Fisheries Branch it is estimated that the local consumption at one time reached a point equal to 45 pounds per capita. During 1919 it is estimated the per capita consumption was somewhere between 23 and 25 pounds per annum.
Canada is one of the greatest, if not the greatest, fish producing countries of the world. Why have our people so little faith in fish?

Those Midsummer Exams.

(With apologies to Dent's English Poetry, Book II.)
The sun that hot midsummer day,
Rose cheerless over hills of gray.
The school alone in the landscape lay
Like an evil thing all dull and gray.
And there, inside, the High School lay
All corridors and silent that awful day.
And never its doors might open be
Save to boy or girl of High School degree.
Summer besieged it on every side,
But its pupils were feeling full of pride.
The school opened with a merry cheer,
And through the entrance the examiner
Arrang.
In his hands, held very tight,
Were the papers—an awful sight.
He twos and threes the pupils crept in;
They all were looking very thin.
White as paper was their skin;
Some poor soul called for gin.
Feeling very blue we took our seats.
The awful silence gave us creeps.
The papers soon were passed around;
We viewed the questions with a shiver.
Commenced our work with heavy hearts
And did the questions in fits and starts.
And when our first exam was o'er,
We silently crept through the open door.
A few hours we returned for more
With our hopes growing lower and lower.
And as we settled down to work
The building trembled, heaven and shook.
It was only Goodeve coming in;
He always makes an awful din.
The exam that day was made up sweat,
The sweat poured down in many a jet.
One question there made us quiver,
Then turn cold and start to shiver.
An icicle formed on the end of my nose;
It was a fact—the sweat had frozen.
Exams like those finally failed,
So we went home and enjoyed some
"apnatch."
Our next look-out was in the paper,
Oh, would the results make us caper?
One August eve I heard a rumor,
It came from the honorable Mr. Boyce.
"The whole darn bunch of us had failed."
"Alas," I said, and my face paled.
"This is worse than getting jailed."
It turned out to be a false rumor,
So we soon regained our good humor
And settled down once more to wait
For the Herald tips and our fate.
—Thomas M. Parry

Aircraft Company In Full Flight

Capt. Palmer and Lieut. Fitzsimmons Conducting Passenger Flights
The Air Company in this city tried out its plane with satisfactory results on Saturday last, remaining up for 45 minutes.
Sunday was the first passenger flight, which created pleasurable excitement, not only for those immediately concerned, but for an admiring and proud vicinity. Great interest in the flights were manifested by the citizens.
The first was a trial trip by Captain Palmer and Lieutenant Fitzsimmons. The second flight was taken by Capt. Palmer and J. S. Kirkham, publicity agent, with the first bona fide passenger was Dr. J. E. Horning, osteopathic physician in this city, who, along with Capt. Palmer, enjoyed a fine flight on which he obtained two pictures of Lethbridge.
Describing his sensation, the Dr. said it felt perfectly safe, confident and happy, and physically very comfortable, owing doubtless to the finished outfit with which they are supplied.
Dr. Horning was invited up again on Tuesday to take some more pictures. These are exposed in the window of the Red Cross Drug Store, and orders for the same will be booked and supplied in rotation.—Lethbridge Advocate.

Cowley Happenings

Mr. and Mrs. E. M. Johnston were visiting friends in this week.
Mr. Lane, of Lethbridge, was a visitor to town on Monday.
Mrs. Cleveland and daughter have moved to the ranch, after living in town all winter.
Mrs. Chandler and children have moved into town, the house formerly occupied by Mrs. Cleveland.
Mrs. Wells has returned to her home at Bellevue after a few days' visit with Mr. and Mrs. Robert Littlejohn.
Mr. and Mrs. E. M. Johnston have left by motor for their home in California. They will go via Vancouver.
On Wednesday the married men, playing the single men in a game of baseball, the single men were winners.
A number of school boys boarded the local passenger train on Friday for a joy ride to Lundbreck. They walked back, boys will be boys.
The prizes given by the Women's Institute at the social held in town were won by Mrs. L. Johnston, Miss Nellie McWilliams and Jean Morrison.
One feature the West Wind Club is taking up is Indian, etc., singing. It is estimated that they will give a drill in this art at the school fair this fall.
M. A. Murphy left by Monday night's train to attend the Masonic Grand Lodge at Banff. Fred Snyder is acting as postmaster during Mr. Murphy's absence.
The Women's Institute will be at home in Fustian's hall on the 21st, when Miss Isabel Noble will give an address. Men as well as ladies are cordially invited to attend.
Rev. Mr. McMichael delivered his farewell sermon here on Sunday evening last. As the service began, the infant children of Mr. and Mrs. Clarence Gilmore and Mr. and Mrs. Marion Robinson were christened.

Watkins Spark Plugs "Take"

Just a few principal points to SHOW YOU:

It's a REAL plug—not a "5 and 10" affair. It's
for SERVICE, not to look at. Its drum is of STEEL
—not cast iron, so it does not expand and blow the
porcelain into smithereens.It has SUB-PLATINUM POINTS that will out-
last and give a better and hotter spark than any or-
dinary plug. The porcelain is of ENGLISH CLAY
(Kaolin) baked to resist 2600 degrees heat—400 more
than any car or gas engine generates. Sizes to fit
any auto, truck, tractor or gas engine. Order a set
by mail, phone, or in person from**The Watkins Retailer**

BEECHAM'S PILLS

Fatigue is the result of poisons produced by exercise or failure to digest food properly, and eliminate it promptly with the aid of liver and kidneys.

Vanderhoof Has A Future

Bright Prospects Ahead of the Nechacko Valley District

A thriving British Columbia town that has a very bright future before it is Vanderhoof. Situated in the Nechacko Valley on the Grand Trunk Pacific railway, midway between Edmonton and Prince Rupert, it is the centre of a fine agricultural district, eminently suitable for mixed farming. The soil in the Vanderhoof district is almost inexhaustible and is easy to clear. The land in the Nechacko Valley produces wonderful crops of grain and timothy hay, as well as fine vegetables. Settlers are fast filling up the country, and the Soldiers' Settlement Board has placed a number of returned men on the land. The government is establishing a creamery at Vanderhoof, and undoubtedly it will become the centre of a great dairying district. Much of the land is suitable for steam plowing and the timbered area furnishes good shelter for stock. Sheep raising and mixed farming generally will prove very profitable.

There is fine fishing and good hunting close at hand, mineral wealth in the district, and a pleasant and mild climate.

New Building Material

Experiments are being carried on in building houses from marble dust and sawdust at Vancouver. It has been claimed that the cost of the house in construction will be six cents a foot in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

In Japan practically no women except a few unfortunates go to school.

Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills arouse these organs to activity they thoroughly cure indigestion and overcome the many annoying symptoms.

Bolsheviks Lowest Types of Humanity

First Hand Information Acquired In Intelligence Department

"It is the Russian people were freed and allowed to vote the Bolshevik regime would vanish like smoke, but they are kept down by machine guns and massacres," declared O. D. Stevenson, B.A., of Toronto, a former Stratford boy, at a chamber of commerce luncheon. Mr. Stevenson told of the Red movement from first-hand experience, while in the British intelligence department.

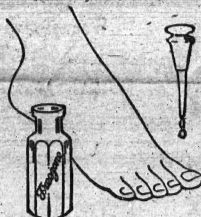

The Bolsheviks he termed the lowest type of humanity who are living by blood and fire with German money and organization to a large extent, but not entirely, behind the movement.

After quoting a literal translation of a proclamation taken from the walls in many towns of Russia, of "Nationalization Women," Mr. Stevenson said that tens of thousands of decent women committed suicide. Those who refused to be nationalized were tortured in a most fiendish manner and then ravished until they died, after which their bodies were quartered and hung up to frighten others.

With a threat of torture, recruits for the Bolshevik ranks were secured. "In one city no larger than Toronto," said Mr. Stevenson, "over 150,000 persons were massacred in three or four months. One of the main streets had, when we entered, between 8,000 and 10,000 dead bodies lying on poles, posts, trees, etc., the men with their vital parts hung around their necks, their eyes pulled out, with imitation epaulettes nailed to their shoulders and horseshoes nailed to their feet. One cannot conceive of any human being acting in the way these devils in human form acted. A dead sea was made against religion, and many of the priests were crucified at their altars."

Lift off Corns!

Doesn't hurt a bit and Frezzone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard corn caluses from bottom of feet. A tiny bottle of "Frezzone" costs little at any drug store; apply a few drops upon the corn or callus; instantly it stops itching and shortly you lift that bothersome corn or callus right off, root and all, without a bit of pain or soreness. Truly! No humbug!

Shipping Grain to U.S.

Large Shipments of Alberta Wheat And Oats Go To The United States

Wheat valued at more than one million dollars has been shipped from the province of Alberta to the United States and chiefly to the state of Montana from January 1, to April 30, 1920, states S. C. Rea, United States consul at Calgary, Alberta. During the same period more than one million bushels of oats were also shipped across the line.

Most of the wheat was shipped across during January and February at the highest price paid was \$3.26 a bushel, while the average was \$3.05. Oats averaged 60 cents a bushel and one shipment \$1.05 was paid. The large shipments of wheat during the first part of the year were caused by the lifting of an embargo on wheat from the United States on December 15. The demand for oats, especially in Montana, created a good price, and that, together with the exchange situation, were big factors in increased shipments of oats.

During the first four months of the year, a total of 374,430 bushels of wheat, valued at \$1,157,562.82, were shipped into the United States from Alberta, as compared with 30,985 bushels valued at \$76,040.81 during the last quarter of 1919. The fact that the embargo was not lifted until December 15 must be taken into consideration in comparing the two periods. A total of 1,131,090 bushels of oats valued at \$674,319.53 were shipped out during the first quarter of this year, as compared with 77,985 bushels, valued at \$39,210.90 for the last four months of 1919.

SNEEFS OUT A COLD IN A FEW MOMENTS

Clears The Nostrils, Stops Sneezing, Heals The Throat Quickly

Catarhazone Works Wonders

Lots of people used to let their colds "work off"—they suffered a whole lot, sneezed around the house, till the whole family finally caught the infection.

Nowadays colds are cured by Catarhazone before they really get a good start. This healing vapor, full of pure essences, gives instant relief. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely sure for catarrh, and in throat trouble—it works like a charm. Catarhazone is a permanent cure for bronchitis and throat trouble. Not an experiment—yet a cure that's guaranteed. Get "Catarhazone" every day, and beware of substitutes. The dollar outfit is guaranteed, and small size 50c; trial size 25c, at all dealers.

Alfalfa Cultivators

Proper Methods to Follow in Order To Ensure Success

Alfalfa may be sown with a nurse crop in parts with a good rainfall if the seeding down is done on land that is not more than one crop from having been summerfallowed. A light seeding of about a bushel of barley or a bushel and a peck of oats per acre is heavy enough seeding for a nurse crop. In the drier sections of the provinces and on land that has not been summerfallowed recently in the wetter sections, seeding without a nurse crop will give much better results. When seeding with a nurse crop the alfalfa should be sown at the same time as the nurse crop. When seeding alfalfa alone, the land, if in summerfallow or hoed crop the previous year, should be top worked until about the first of June and may then be seeded. Stubble should be fall-plowed and top worked in the spring until June and then seeded. Fifteen pounds per acre is the usual rate of seeding.

Northern green alfalfa seed of the Grimm, Turkistan, or Baltic varieties must be used. Grimm being harder than either of the other two. Before sowing the land, or the seed must be inoculated with alfalfa nitro culture unless the land has grown alfalfa of recent choice previously. Of the seed methods, inoculation of the seed is usually easier, and gives good results. If these two precautions are taken, the first steps necessary to success are assured—N. D. McKenzie, Supt. Indian Head Experimental Farm.

Americans Interested In Western Lands

New York Financial Houses Investigate Lethbridge Irrigation Project

Investigation of the Lethbridge Northern Irrigation Project by two New York financial houses of high standing, will be undertaken in the immediate future with a view to purchasing the bonds of the irrigation district, it was asserted by L. M. Roberts, a leading barrister, on his return to Calgary from New York. Mr. Roberts, who some time ago obtained an open option for the purchase of the bonds, went to New York in this connection. He anticipates that the inquiry into the irrigation undertaking by engineers sent out by the financial houses will take place in June. The terms of his option are not such as to interfere with the right of the irrigation district to make any other arrangements for the sale of the bonds, which they may desire, and in the event of a definite offer being made the district will have the right to accept or refuse.

Prophecy Success

Gen. Sir Arthur Currie, before he was a lawyer, and real estate man, won an enviable reputation as a war leader and became the commander of the Canadian Expeditionary Forces. He shows New World versatility again by accepting the offer of principal of McGill University, Montreal, succeeding Sir Auckland Geddes, British Ambassador in Washington. Most fighting Canadians will prophesy for his success in his new post—New York World.

Minard's Liniment used by physicians

Advertising His Want

She—And how is your bachelor friend?
He—When I saw him last he was mending shoals.
She—Indeed, I didn't know he had been ill.
He—He hasn't been; he was sewing some buttons on his clothes.

W. N. U. 1319

Strengthers to Truth

The preacher announced that next Sunday his subject would be "Lara" and that he would be very glad if during the week, they would read the 17th chapter of Romans for themselves.

The text Sunday the preacher commenced by reminding his hearers of the request he had made, and asked all those who had read the 17th chapter of Romans to stand up. To his astonishment half the congregation stood up.

"Thank you very much" said the preacher, "now it is to you I want to speak today, because there is no 17th chapter of Romans!"

A Losing Game

He—Life with me has been a failure.

She—You must have had and wasted some opportunity.

He—No! I have spent half my life raising whippersnappers to conceal my youth, and the other half in dying them to conceal my age.

NOURISHING FOOD AND GOOD HOURS

Help You To Resist Disease — Aid These With A Tonic To Keep The Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. You weaken this power when you let your general health run down, your nerves get thin and your nerves unsteady.

You weaken it when you worry, when you overwork, when you do not get sufficient sleep, and when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

To preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further intensify and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Williams' Pink Pills, which are free from opiates and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. C. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was a weak, nervous, and nervous condition, suffering from many of the well known symptoms of anaemia. My mother procured a supply of Dr. Williams' Pink Pills, and after taking about a dozen boxes I was restored to normal health. Again after my marriage, and before my first baby was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely broken in health. Part of the time I was under the care of two doctors, and for three months I was practically between life and death. Again, after my mother's suggestion I started the use of Dr. Williams' Pink Pills. I had not been taking them long before I could tell that they were helping me. Day by day I could feel my strength returning, and was soon enjoying good health once more. In view of my experience I think I can safely say there is nothing in the way of medicine better than Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

The Only Safe Place

"Why," asked a Missouri paper, "does Missouri stand at the head in raising mules?"

"Because," answered another paper, "this is the only safe place to stand."

DANDERINE PUTS

BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, gleamy tresses. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor, and vitality.

Get a 3-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

Bees Culture is Profitable in Alberta

Edmonton Apiarist Proves That Beekeeping is Profitable

Bees have proved themselves not only adaptable to the climate of Western Canada, but very profitable to raise as a side line, and as an example of this, the experience of Mr. William Wensel, of Edmonton, may be given. Mr. Wensel has been keeping bees for the last six years. The returns he has obtained from them go to show that they can be reared economically, and that the honey produced is fully equal to any of the imported variety.

Mr. Wensel started with a foundation swarm of mixed bees. By using only well-bred queens, which he imported from Tennessee, he managed, within a few years to improve his swarm that he had an almost pure strain of Italian bees. He keeps from ten to fifteen hives of bees, disposing of the increase in the spring or fall.

"From the standpoint of profit and pleasure, it can hardly be equaled by any other member of the animal or insect family producing food for human consumption. In the spring of 1918 Mr. Wensel had nine hives, three of which were in very poor condition. During the summer the nine hives increased to 21, and honey produced, less the amount left for winter feed, was eight hundred and twenty-seven pounds. The honey sells at from 35 to 40 cents per pound. In 1918 the record of production during the aping was 100 lbs. per hive, or, at 40 cents per pound, \$40 worth of honey per hive.

Bees require very little attention in Western Canada. With a clover or alfalfa field in the neighborhood and supplied with sufficient comb and suitable hives, they will practically look after themselves for the whole summer. In the fall the hives containing the bees are either stored in a cellar or left out in the open. If the bees are left outside, a box large enough to cover the hive and leave a space of about four inches on all sides is put over the hive, and the space filled with chaff. An opening, however, is always provided. It has been found that when the hive is plugged up the bees will come to work when the opening is and work until they die in their attempt to get out. On the other hand, when there is an opening they never go out unless on very bright sunny days.

Mr. Wensel's experience goes to show that it is better to winter the bees outside. They are not only more active and start to work earlier in the spring, but seem to be in far better health. However, if the bees are kept in a cellar over the winter it has been found best to take them out about April first.

Bees come out and are ready to start their season's work as soon as the warm weather begins. The hives are then cleaned out and the frames and combs put into place. From then on they require no attention until they start to swarm towards the end of May or the beginning of June. Between this swarm of the season, if put in a cellar of its own, may hatch out a second swarm. One season one of Mr. Wensel's swarms that were hatched in June produced 99 pounds of honey the same season.

It is the practice to take out some honey and put on a super, with a comb excluded to induce honey production about the end of July. In September, all except 35 or 40 pounds of honey, which is left as winter feed, is taken out and the hives prepared for winter.

Rural Depopulation

Fathers of Our Farms Must Remember the Young Man's Needs

How shocking the facts would appear if only had the statistics on how many young men have left the farms because their fathers drove them off! They just could not stand it any longer with their dads.

A study of this side of the question of rural depopulation would be illuminating. It is tragic what narrow-mindedness, bigotry, and prejudice, lack of vision, lack of appreciation, lack of sympathy and lack of praise and encouragement have done and will yet do in robbing the farms of their very best young blood.

Surely the fathers of our farms must learn anew and remember the young man's needs—real and imagined—and his point of view; and give and get in return the requisite confidence, comradeship and understanding. Otherwise there is the loss of the great loss indeed!—Rural Canada.

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

Of Local and General Interest

W. G. Akey was up from Pincher Creek yesterday.

Capt. Fisher is enjoying a brief visit down the Okanagan.

Women and automobiles are in the same class. Both can drive a man mad.

J. M. Coombs, subscription agent for the Lethbridge Herald, is doing the Pass this week.

A. Cameron, of Coleman, anticipates a bumper fruit crop from his farm at Wycliff, B. C.

Mr. and Mrs. Collette and children, of Calgary, are in town and registered at the Cosmopolitan.

Three Newfoundland members of the house of Assembly have been unseated for election bribery.

Mr. Liddle, for some time in the jewelry business at Coleman, has sold out, and will take up fruit ranching in British Columbia.

A baseball game played on Sunday evening last resulted in a victory for Coleman over Blairmore to the tune of 12 to 2.

H. E. GATE, Coleman

Mrs. Jane Peach went up in the air with Capt. "Jack" Palmer at Lethbridge, while Mrs. Vera Nother accompanied Lieut. Harry Fitzsimmons into the backwoods of Montana.

John T. Sterling, chief inspector of mines for the province, and chairman of the workmen's compensation board, lies dangerously ill with neuritis in an Edmonton hospital.

So much interest is being taken in golf this year, that tennis is absolutely forgotten locally. Some six hundred dollars have been spent on the golf course, making it one of the finest in the province.

The Japanese war office has announced that according to Russian witnesses, several hundred Japanese, including women and children, were murdered at Nikolskaya, Siberia, by Bolsheviks on March the 12th.

It is proposed to hold all football games this season, on Saturdays, and the league will begin the schedule on Saturday next, Blairmore playing at Hillcrest and Bellevue playing at Coleman at 6:30 p. m.

The Crown's Next Pass Football League is now well organized, and in all the Pass towns clubs are active. W. H. Chappell and Jim Turnbull are on the local executive, and as both are old-time enthusiasts we may look forward to a lively season of football.

At a meeting addressed in Montreal last week, Senator Robertson appealed to Canadian labor men not to listen to the agitation of promoters of One Big Union idea and "wildly misrepresenting" the federation. An appeal was made to labor and capital to arbitrate their differences.

British Columbia people touring through Alberta are so convinced that this province is absolutely dry that they all take a bath either at the Summit Hotel or in Elk River before crossing the great divide, and we notice that far more dust sticks to the eastbound cars than to the westbound cars.

There will be a race in the Pease pool hall on Saturday night. The loss from strikes in 1919 is estimated at two billion dollars.

Mr. Gillis returned from Calgary this week, having been in attendance at the appeal against him.

Ten million dollars will be spent in railway improvements and extensions in Newfoundland.

A free dance is being advertised to take place Saturday night in the brick hall south of the track.

The "L. B. K." Store features, all the time, Special Values in Quality Foodstuffs.

As motorists deplore the low ebb of reason in this province, it is probably drowned out or creates a little intoxicating inspiration.

The Crown's Next Pass branch of the Alberta Traders' Alliance will hold their second grand ball at the local opera house tomorrow night.

An auction sale of farm stock and implements will be conducted by V. T. Eddy on the local farm, ranch near Noyah, on Saturday of next week.

Rev. and Mrs. W. F. Young, who have been in attendance at the annual Methodist conference at Edmonton, are expected to return this week end.

Eddie Fingard and his boxing manager, Joe Levine, who are agents for the Merchants' Casualty Company, were transacting business in Blairmore last week.

About the first record of a lawyer we find in Matthew 22, verses 35 to 39, when he dared to tempt Jesus. They wouldn't think of the like nowadays.

Cowley Oddfellows will hold their annual ball on Thursday, June 18th. This affair was to have taken place early in February, but owing to the presence of an epidemic of sickness it was decided to postpone it.

Miss Ola McLaren has been successful in carrying off a gold medal for general proficiency in commercial work at Mount Royal College, Calgary. She also attained highest place in penmanship, entitling her to another gold medal, but as no scholar shall receive two medals the prize on this occasion was reserved to the next in rank.

A fire was started on Tuesday evening by carelessness on the part of small children in the basement of what is known as the Nicofor bakery, now the property of J. E. Gillis. A girl passing by happened to notice the smoke issuing from the basement window of the unoccupied building and made the alarm just in time to avoid a serious conflagration.

At a regular meeting of the Blairmore Athletic Association, held in the Miners' hall on Monday night, the following officers were elected for the year: J. Charbonnier and J. Turnbull, honorary presidents; W. H. Chappell, president; Fred Allot, first vice-president; James Crowder, second vice-president; Finance Committee: F. Allot, J. Crowder, A. Hamilton, W. H. Chappell and A. Morency. A. Morency, secretary. It was decided to join the Crown's Next Pass Football League.

Local business men are trying to figure out what to do and what not to do regarding the collection of the new luxury tax—which should have been named the d. f. tax. No matter how the peck thing is worked out the poor man—the one who can least afford it—will pay the piper. We were taught in school that in Union there is strength, but the writers of the old school books did not live under a Union government or they would have inscribed "In Union there is Chaos."

Miss Hall has been visiting with her sister, Mrs. D. M. J. Conway, here.

We understand that Miss Ola McLaren will accept a position in the office of the West Canadian Collieries.

Mrs. Ariel and children came up from Lethbridge on Sunday morning, and will remain here for the greater part of the summer.

Mrs. Ferguson, of Macleod, is spending a few days with her daughter-in-law at the Cosmopolitan, and her son at the Sanatorium.

The Blairmore Exchange has just received a full carload of second hand furniture. Also three bicycles in first class condition. Call early for soap.

While practicing football last evening, Bill Chappell kicked himself on the wrist and chin, and is slightly indisposed so that he can hardly hit or whisper.

The girls' branch of the Anglican Women's Auxiliary are holding a tea and sale of home cooking at the home of Mrs. Frank Wright, from 3 to 6 on Saturday afternoon. Tea 25 cents. Everyone welcome.

Fred Hanson, of P. Burns' Bellevue branch, is on a visit to the coast for a few days. Mr. Mitchell is relieving him as cutter at the Bellevue market.

Owing to word not having been received from the board of public utilities commissioners, the vote on the sidewalk money by law could not be taken today, as advertised.

F. A. Saad, of Fernie, is buying out Haddad Bros. at Bellevue and the big store is closed for a few days for stock-taking. A sale will start on Saturday, to continue till June 30th.

A. H. Clarke is appearing before the appeal court at Calgary in behalf of Dr. Olivier's appeal against the lower court's decision in the case of Wood vs. Olivier. Wood is represented by H. Ostlund, of Lethbridge, and A. Macleod Sinclair, K. C., of Calgary.

At least five vacancies will occur in the teaching staff of the Blairmore public school, to be refilled in September. Five resignations are being submitted for the board's consideration. In addition, in all probability two others will be required to look after the new primary school to be erected by the West Canadian Collieries.

A lively boxing exhibition was staged at Bellevue club room on Thursday night last, when Freddie Beale, late of the R. A. F., and Tommy Hamilton, late of the Imperial forces and Blackfriars, London, England, boxed six rounds to a draw. Eddie Fingard acted as referee and engaged each of the contestants to three rounds at the finish.

Members of the L. O. O. F. are reminded of decoration services to be held on Sunday next at Coleman, leaving the Coleman hall for the cemetery at 2 o'clock. On Sunday, the 30th, members of the local lodge will proceed to Hillcrest cemetery at 1 o'clock, and after decorating graves there, will continue to Bellevue to participate with members there in similar exercises at 3 o'clock.

Every man who lingers in his cellar these days isn't setting traps for muskrats.

Thursday last was observed as a holiday by local stores, it being the official King's birthday.

Capt. Beebe has leased his office to a company of Chinamen who propose to convert it into a restaurant.

Miss Lillian Harrison, of Kootenay Lakes hospital, Nelson, is visiting her parents here for a few days.

Rev. F. D. Jones, one time pastor of the Methodist church at Bellevue, and lately of Lamont, Alberta, is likely to become pastor of the United church at Lethbridge.

Canadian cents of a new size were struck at the mint for the first time last month. The first two coins minted were presented by the master of the mint to Sir Thomas White.

A fellow was met on a Blairmore street the other day, and when asked why he was looking so pale and unsteady, replied: "Well, you know, atmospheric conditions in the Crown's Next Pass are not at all conducive to sobriety."

One of the biggest farm deals consummated in the Pincher Creek district this year was put through the other day when E. C. Peck, of Lethbridge, bought the big Hansen farm, lying between Pincher Station and Pincher Creek.

District Attorney Roman Hellman, of Madison, Wis., has planned a unique campaign against reckless drivers. He proposes to fine a driver of the vehicle, but the punishment is not confined to the pilot, but extends to include the car as well. Future speeders will be compelled to give up their cars for a period of as many days as the number of miles per hour by which they are exceeding the speed limit when the arrest is made.

Search is being made at Cumberland, B. C., for the ten casks of rum, which, according to Indian legends have been buried there for the last century and a half. The story which has been handed down, is that the rum was brought into the north by a French trading party, who stopped at Cumberland House and were turned back by the Hudson Bay people after they had hidden the liquor which had been intended for Indian trade. The alleged cache is supposed to include also merchandise, muskets and ammunition, but it is thought that these goods may have aged to the same advantage as the rum, which is the subject of the search.
